

CEC 544 ESL Students in the Mainstream Class

At some point in our teaching careers we all face the challenge of working with ESL students. This course will help you understand the process of learning a second language, the normal stages an English language learner goes through, and the ways you can make students feel comfortable and succeed in your classroom.

Learn how to communicate through the use of body language and basic words, how to engage the student's prior knowledge and how to accurately assess English language learners' progress in your classroom.

Most importantly, you will discover how to turn what can be a source of frustration for both you and the ESL student into a rewarding and enriching experience for you both!
