

Natural History of Long Island

The Natural History of Long Island is a course for every teacher that lives and teaches on Long Island. Through the use of lectures, slides, videos and field trips, participants will be able to truly appreciate the beauty of this place. During our field trips a camera and binoculars will be helpful. Slide film is recommended to produce lessons for your classes.

The boulder beach at Montauk Point, barrier beach ecology of Fire Island, the cliffs of the North Shore and many other sites will be studied. Proper attire for all types of weather and comfortable shoes are a must. Trips are not dependent on weather, and strenuous walking is anticipated. Since many sites are remote, a day pack and bag lunch is suggested.

Inservice

<i>Instructor:</i>	<i>Paul Wangenstein</i>
<i>Days:</i>	<i>Saturdays & Sundays</i>
<i>Date:</i>	<i>March 13, 14, 20, 21, 2010</i>
