

Retooling for Teaching and Learning in the 21st Century

Every professional field has been changed by the use of technology. Today's students need to use technology in the classroom to ensure that they are better equipped as adults to enter the workforce. It starts with the teacher. There are many ways technology can be used to create learning environments that are learner centered, knowledge centered, and assessment centered. In this course we will look at and create podcasts, hotlists, video conferences, and digital storytelling. We will also examine what Web 2.0 has to offer.
