

Creating The 21st Century Classroom

Technology is constantly advancing and forever changing the way we deliver information to our students. This course is designed to provide answers to the questions classroom teachers have on how to use computer technology in the classroom. It will deliver hands on experience for each participant as you use technology to create projects in class. All activities can be implemented immediately into your lessons and will address the New York State Learning Standards. The course will focus on using the following software: Power Point, Publisher, Word, Smart Board Notebook Software, as well as a variety of on-line software and services. Suitable for beginner to intermediate users grades K-12
